

4-Rent

The plug&play modular system for rental.

ScreenLine's rental screen has been completely renewed improving the distinctive characteristics: quick mounting, flexibility of sizes, T-stands and trolley bag supplied.

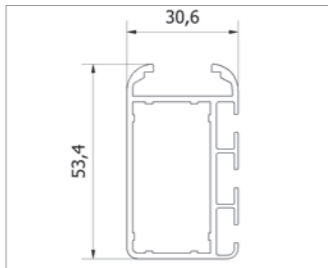

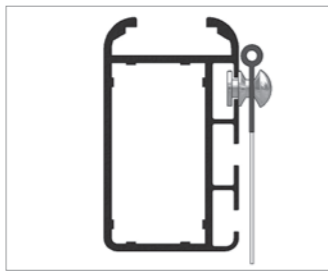

The basic structure is made of four corners with a 270° opening rotation and a blocking/unblocking system with pressure buttons. Each corner is 91.5x122 cm and when they are connected together they reach the base size of 244x183 cm. The aluminium structure along with the high-resistance steel junction guarantee working precision and reliability.

As an option, a number of middle segments are provided, with aluminium structure, steel bayonet coupling fitting and pressure button to release. They are available in different sizes: 47.75, 61.00, 91.50 and 122.00 cm, and combined together or with the corners it is possible to obtain several sizes in three different formats: 4:3, 16:10 and 16:9. In total 9 screen sizes, the largest of which measures 488x366 cm, thus covering the 85% of the rental market requests.

Of course, every different size needs a dedicated projection fabric equipped with rubber eyelets all along the perimeter for quick mounting and perfect flatness.

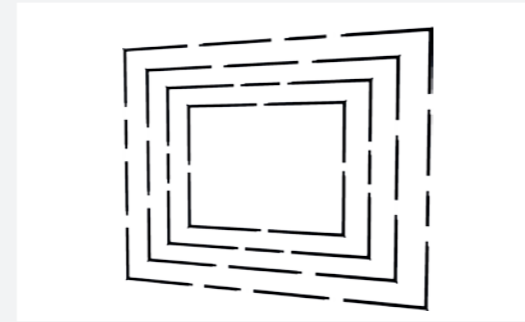

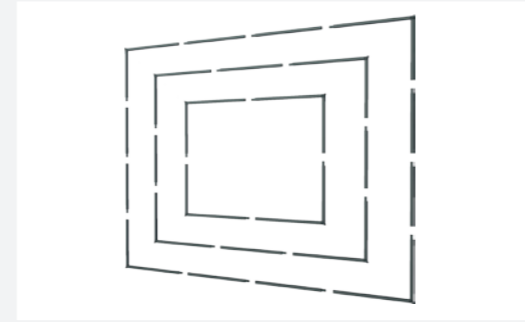

The equipment is completed by a pair of high-resistance aluminium T-stands (30 cm or 40 cm squared section according to the size of the screen) painted anti-glare matt black and a hard synthetic trolley bag which contains everything. The bag is designed to carry the basic structure, the additional segments, the two T-stands and the two fabrics. More projecting solutions always ready at hand.

Technical details

Available sizes chart

4-Rent7x			Corner nr.	Extensions composition			
				46	61	91.5	122
244 x 183	x		4				
305 x 183		x	4	2			
305 x 229	x		4	2	2		
366 x 229		x	4	2			2
366 x 275	x		4			2	2
427 x 275		x	4		2	2	2
427 x 320	x		4	2	2	2	2

Screen characteristics

- quick mounting, thanks its structure made of corners which fit together bayonet coupling and pressure buttons for safety and disassembly
- The fabric has rubber eyelets all along the perimeter and is easy to position
- modular screen: thanks to the combinations between corners and middle segments it is possible to obtain different sizes in the most common formats (4:3, 16:9 and 16:10). The largest size is 488x366 cm and it covers over 85% of the market requests.
- complete system: each model comes with its frame (corners and any additional segments), a projection fabric, a pair of T-stands and a trolley bag of hard synthetic material

Available fabrics

- Diamond
- Ambra retro-projection
