

Big Lodo

The screen for open plan rooms.

Theatres, conference rooms, halls, congress centres. These are the typical environments for which this model was designed.

The structure is made from a combination of aluminium and steel with a large diameter aluminium tube, reinforced in order to prevent bending and activated by a big torque SOMFY motor. The box protects the fabric from dust or impact with other hanging objects.

It can be equipped with a winch lifting kit which makes it easier to lift it when mounting and to lower it for cleaning, mending and other maintenance operations.

The packaging consists of a solid steel reinforced wooden box which makes transport safer also for long distances.

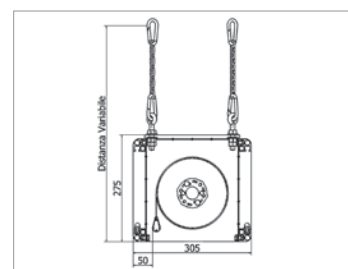

Screen characteristics

- mixed aluminium and steel structure
- powerful and quiet motor
- wide range of fabrics and sizes
- safety anchor chains
- reinforced wooden box packaging
- lifting kit on request

Available fabrics

- White Ice
- Home Vision
- Perforated sound-transferring
- Coral retro-projection
