

# Fashion Velvet

A particularly pleasant look along with careful design for all details. The smooth inward rounded borders with black velvet finish absorb any possible overlapping of the projected image.

The nylon corners are finished in the same way as the rest of the frame giving it a sense of continuity. Mounting the structure requires just a few minutes and the fabric results perfectly flat. The perimeter groove and the accessories provided make it possible to fix the screen to the wall or to let it hang from the ceiling.

Wide range of fabrics: standard white or retro-projection, Grey High Contrast, and very bright 3D Pro Active for daylight projection. If Microperforated fabric is used, the audio equipment can be concealed behind the screen, keeping loudspeakers and cables out of sight. The screen can come with a back lighting system made of an RGB LED stripe which projects light around the screen, controlled by remote or interfaced with room control systems.

## Technické detaily

## Charakteristika plátna

- vision ratio for anamorphic format
- standard velvet profiles
- painted aluminium frame available on request
- rounded corners in compliance with TUV safety regulations

## Typy tkaniny

- Diamond
- Microperforated
- Grey High Contrast
- Pro Active 3D
- Ambra retro-projection
