

Machbet.

In this mechanical structure the screen looks particularly smooth and pleasant as to perfectly fit high level interior design environments. The shape of the box allows mounting both to the wall and the ceiling also where it would be quite visible, since its visual impact is very low. The horizontal position of the rolls and the motors makes its operations very precise and silent.

The pictures below show the configuration obtained matching a blinding surface with a projecting surface.

Technical details

Screen characteristics

- round shaped box, with coordinated side end plates
- perfect flatness of the projection surfaces
- silent and quick functioning
- motors on the right side
- screens with particularly silent motors up to 300 cm base available on request
- double independent Somfy motor interfaced with home automation systems and control rooms
- extreme versatility of installation with original solutions
- seamless fabric
- wide range of available fabrics

Available fabrics

- Flat vision
- Home Vision
- Microperforated
- Grey High Contrast
- Coral retro-projection
- Blinding fabric
- Digital print fabric
- Nova-Vision
