

Vertical Galileo

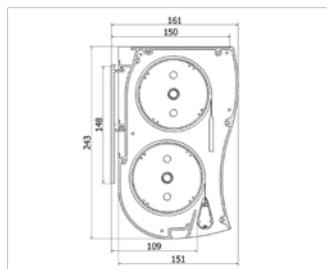

Vertical Galileo

Here the rolls are stacked inside a box which looks innovative and sophisticated. The shape of the box completely conceals the rear mounting brackets while on the flat upper surface can be placed the audio satellites, instead of hanging them on the wall. Moreover, a special groove in the rear part of the box can host the cables of the loudspeakers, thus keeping them out of sight (see below).

The screen can be equipped with an RGB LED back lighting system inserted in a downward oriented groove which projects the light behind the fabric. Connected to a home automation system, it becomes a light source which can change intensity and colour according to the desired ambience.

Technical details

Screen general characteristics

- double independent Somfy motor interfaced with home automation systems and control rooms
- extreme versatility of installation with original solutions
- seamless fabric
- wide range of available fabrics
- 90° rear corner for better ceiling installations
- hidden supporting brackets
- supporting surface for L-C-R loudspeakers
- RGB LED back lighting compatible with control room systems (on request)
- perfect flatness of the fabric thanks to the front drop of the cloth
- motors on the right side
- screens with particularly silent motors up to 300 cm base available on request

Available Fabrics

- White Ice
- Home Vision
- Microperforated
- Grey High Contrast
- Coral retro-projection
- Blinding surface
- Fabric for digital print
- Nova-Vision

Rozmery - Cenová ponuka s rôznymi povrchami na dopyt.
