

Inceiling Advanced

Motorized screens mounting system with built-in technique.

The feature of this product is that the in-ceiling box is separated from the screen itself. The purpose is to make installation operations quicker especially when the screen dimensions are important.

The light weight makes it possible to deal with potential unevenness of the ceiling and the false ceiling and, last but not least, to be able to fix the screen once the work is finished to avoid the risk of accidental damage.

The advanced system exclusively applies to MOT motorized screens, both standard and tensioned, from 203 cm base to 406 cm base.

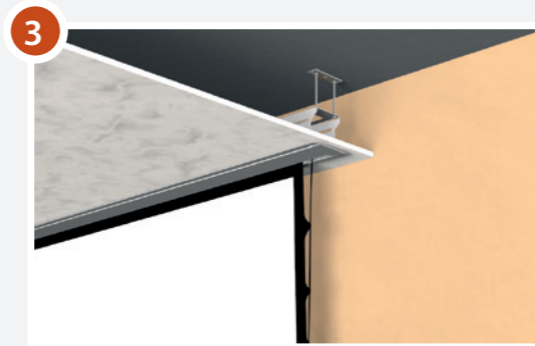

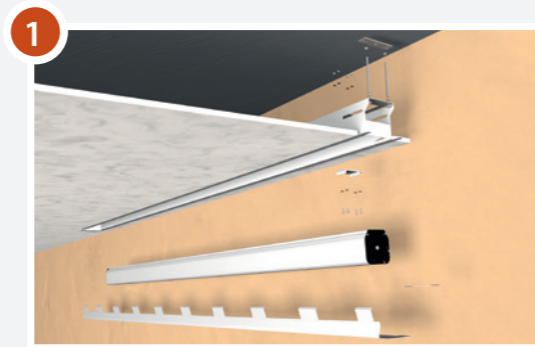

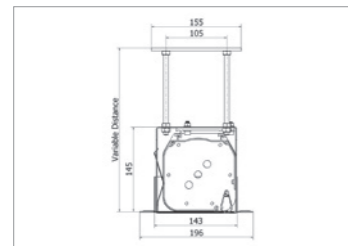

Screen characteristics

- safe-plug system in order to protect the screen
- mounting flexibility with 15/110 spacers
- screen fixing separately
- safety wings in the box

Available fabrics

- White Ice
- Home Vision
- Microperforated
- Grey High Contrast
- Coral retro-projection
