# Jago

Performance with style.

Jago model characterizes itself by clean lines and rounded profile. It 's a screen dedicated to the domestic applications where aesthetics and performance come together in harmony. Provided with tab tensioning system as standard. In the version / R the elegant design is enhanced with an integrated remote control option. This series of screens, driven by the transmitter, eliminating the unsightly external receivers and offer extreme reliability. Jago, thanks to its sturdy chassis can cover a wide range of different measures (bespoke and customised, too) and reaches up the maximum size of 450cm base width. Moreover, a number of different fabrics is available on this screen: from the standard white one to the high-contrast grey, from the acoustically transparent to the retro-projection. All these facts are making Jago an ideal screen for home theatre applications.

Technical details

Screen characteristics
