

Keplero

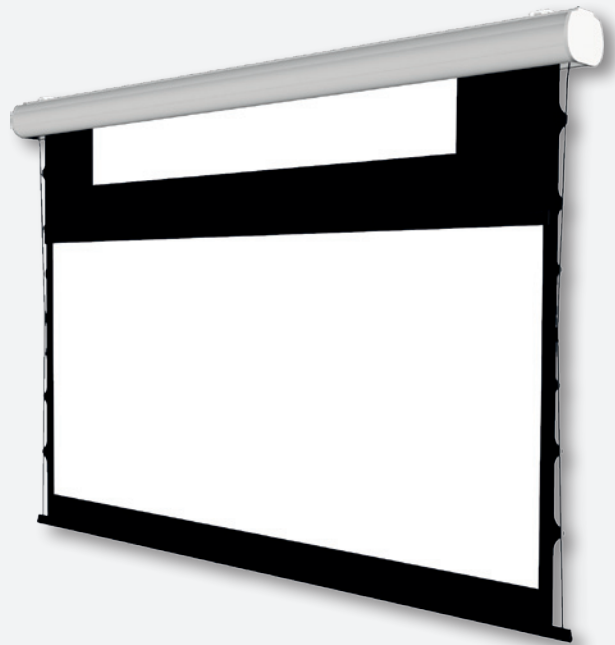

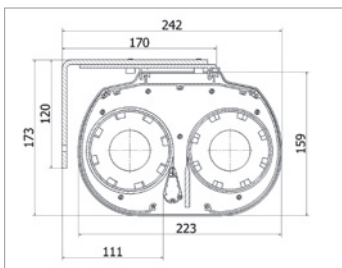

The multi-format screen for projectors with 16:9 native matrix.

Keplero features the new Somfy motors with inbuilt encoders and dedicated control unit to independently operate the movements of the two fabrics.

Somfy electronics allows to obtain up to 4 different preset formats, the first being dedicated to the 16:9 format.

Motors and electronics are activated by the radio frequency remote control but also by any home automation system or control room commercially available. With the new technology it is possible to change the video formats by simply activating the remote control provided and is also possible to program the unit to lower or to lift the screen and adjust the formats at will with 5 cm precision.

Technical details

Screen characteristics

- standard tensioning
- Somfy motors and electronics interfaced with home automation systems and control rooms
- customized formats from the remote control
- round shaped box with coordinated side end plates
- seamless projection fabric

Available fabrics

- Home Vision
- Microperforated
- Grey High Contrast
- Coral retro-projection
