

Pro Frame

Simplicity and convenience.

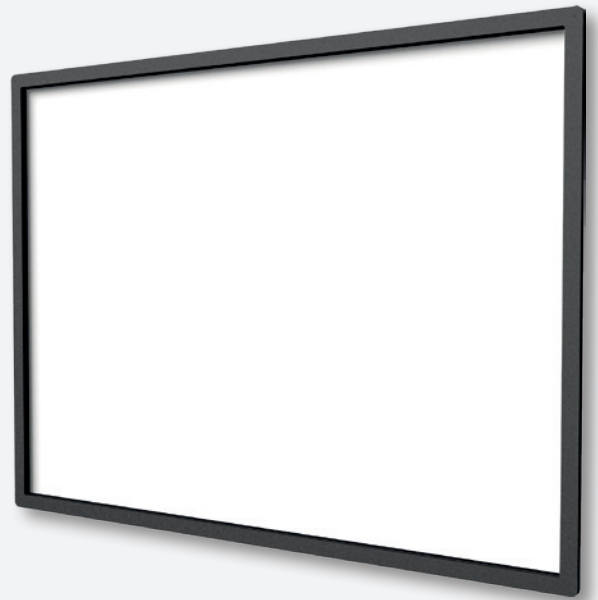

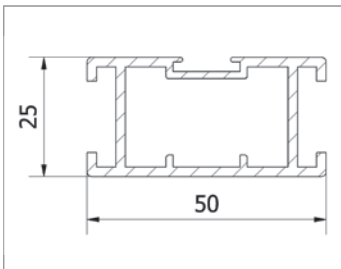

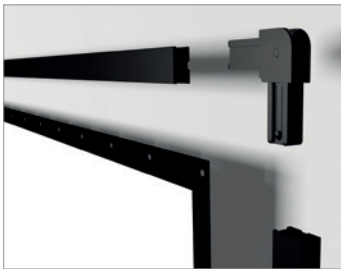

Never has a screen been simpler to mount and quick to position.

Designed and built using the aluminium profile of the Multi-Frame model it features longer segments, from 100 to 250 cm, and a soft black PVC trimmed fabric mounting system.

It keeps the Made in Italy's products quality combined with an extraordinary flexibility.

It comes with a wall mounting brackets kit, but it can also be hung from the ceiling or fixed on the T-stands for floor application, available on request.

Technical details

Screen characteristics

- aluminium structure
- wide range of fabrics with black PVC border
- easy mounting
- T-stands for floor application on request

Available fabrics

- Diamond
- Microperforated
- Grey High Contrast
- Ambra retro-projection
