

Trim

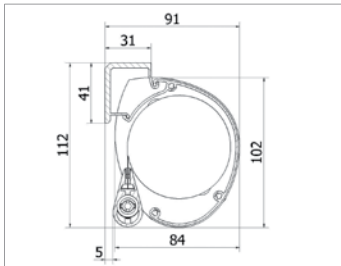

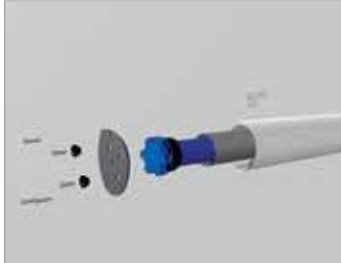

The plug&play motorized screen.

With its particular drop-shaped design, the aluminium box has compact dimensions and a safe system to be easily mounted to the wall.

Its supple line well fits different environments turning out to be the perfect solution for installations where it is necessary to match the high quality of the components and of the Somfy motors with an adequate price.

Trim comes in three different standard sizes (no custom) with White Ice fabric, while the perimeter masking for 16:9 and 4:3 formats are available on request.

Technical details

Screen characteristics

- smart design
- quick mounting system
- Somfy motors

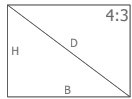

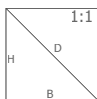

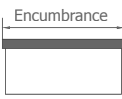

Available fabrics

- White Ice
- Home vision (upon request)
