

# Wave Biformat

## Flexibility without compromises.

With this versatile screen, ScreenLine wanted to create a product able to meet the requirements of the most demanding professionals. **One of a kind, it features two independent projection surfaces which can be activated separately, the purpose being to offer solutions which standard products cannot.** It is possible to mount two fabrics with different video formats, e.g. 16:9 and 21:9, or, if the screen is placed in front of a window, a blinding surface and a projection one. With two back-to-back fabrics it is possible to project from both sides, or on a frontal fabric and on a retro-projection one. Last but not least, a HD projection surface and a 3D one. In a conference room it might be interesting to have a fabric with digital print which reproduces the hotel's or the conference centre's logo plus another one to deploy only when projecting. Extremely versatile! Like all WAVE screens, it features a smart look and all the other characteristics that make this family of products unique.

## Technical details

## Screen characteristics

- two independent motors
- possibility to interface with home automation control systems
- round-shaped box with 90° rear angle for better ceiling installation
- hidden fixing brackets
- flat upper surface to place L-C-R loudspeakers
- prearranged groove for audio cables
- RGB LED back lighting compatible with all home automation control systems (on request)
- front surface drop to improve flatness
- motors on the right side
- custom features
- particularly silent motor available on request up to 300 cm base

## Available fabrics

- White Ice
- Home Vision
- Microperforated
- Grey High Contrast
- Coral retro-projection
- Blinding fabric
- Digital print fabric
