

Wave Tensioned

Nové ScreenLine napínacie plátna

From the project which has represented the breakthrough in motorized screens design here is the tensioned version: the projection surface is provided with a lateral tensioning system ensuring perfect flatness of the fabric which will remain constant under any intense usage and over the years.

The projection surface deploys at a set distance from the wall behind, thus leaving enough space to conceal a picture or even a plasma TV set.

All the other functioning characteristics of WAVE models remain the same: elegance, easy mounting, possibility to equip with a RGB LED back lighting system.

Technické detaily

Charakteristika plátna

- 90% rear angle for better ceiling installation
- hidden fixing brackets
- supporting surface for L-C-R loudspeakers
- prearranged groove for audio cables
- RGB LED back lighting compatible with all home automation control systems (on request)
- front surface drop in order to improve flatness
- motor on the right side
- white tensioning on request
- custom features
- particularly silent motor available on request up to 300 cm base

Typy tkaniny

- White Ice
- Home Vision
- Microperforated
- Grey High Contrast
- Coral retro-projection
